

Turn the numbers you already have into a monthly advisory service.

Milōn gives accounting firms a shared client workspace that turns financial data into a clear health score, forward-looking cash view and actionable advisory — ready for the accountant to review and sign off.

The opportunity: give clients a reason to engage between compliance cycles, while making the work repeatable across the portfolio.

ADVISORY IS HARD TO SCALE
Useful monthly analysis takes time. Multiply that across a portfolio and the economics quickly become difficult.

CLIENTS WANT MORE THAN COMPLIANCE
Owners want to know what the numbers mean and what they should do next — not only whether the books are correct.

ATTENTION IS LIMITED
You need to know which clients are deteriorating and where intervention is worth your time.

WHAT YOU GET

Portfolio health See every client's score, trend and needs-attention signals from one practice dashboard.	Client-level diagnosis 31 ratios, four pillars, benchmarks, trends and a 13-week cash view in the same workspace.
Advisory drafting AI drafts the advisory from the client's numbers; you edit, review and sign off before anything is delivered.	Your name on the sign-off Your firm reviews and signs off every advisory pack. Signed-off reports carry the accountant's name and the sign-off date.
A monthly reason to engage Notes, actions, acknowledgement and report history create a repeatable client cadence.	Built for leverage Upload on behalf of clients or let them upload. Use one shared engine across the whole book.

FROM DATA TO ACTION

- 1 Create the firm account and add a client.
- 2 Upload figures or connect QuickBooks Online or Xero.
- 3 Milōn produces the same health view the client sees: score, pillars, ratios, cash and next moves.
- 4 AI drafts the advisory. Your team reviews, edits and signs off.
- 5 Send the signed-off pack and track acknowledgement, actions and follow-up.

Milōn sits on top of the books. It does not replace your ledger or compliance software — it is the advisory layer between the numbers and the client conversation.

START WITH ONE CLIENT

Create your firm account, add one client and see the workflow before rolling it across the practice.
