

Know what needs attention. Know what to do next.

Milōn turns your financial data into a simple, living picture of business health — with a forward-looking cash view and practical next moves.

You don't need to wait for the next annual pack to understand what is happening in your business.

THE BUSINESS MOVES FASTER THAN THE REPORTING

A business can develop a cash or margin problem months before it becomes obvious in a traditional report.

NUMBERS WITHOUT A DECISION AREN'T ENOUGH

Seeing that something changed is useful. Knowing where to look and what to consider doing is better.

YOU SHOULD NOT NEED TO BE AN ACCOUNTANT

The important financial picture should be understandable without decoding a 40-page report.

WHAT YOU GET

One health score A simple view of overall business health that updates when your data changes.	Four pillars Profitability · Cash flow · Asset productivity · Financing & solvency.
31 ratios + benchmarks Margins, returns, liquidity, working capital, gearing and more, with transparent arithmetic.	13-week cash forecast See potential cash dips ahead and the suggested moves that may improve the position.
930+ next moves A ranked playbook filtered to your situation, so the numbers lead to action.	Work with your accountant Invite your accountant into the same workspace, with notes pinned to the figures they discuss.

FROM DATA TO ACTION

- 1 Sign up and upload one set of figures — or connect QuickBooks Online or Xero.
- 2 Review the extracted figures before they count.
- 3 See your health score, four pillars, ratios, trends and cash outlook.
- 4 Review the next moves and add the useful ones to your action plan.
- 5 Invite your accountant so both sides work from the same picture.

Milōn does not replace your accountant. It closes the gap between the numbers they prepare and the decisions you need to make between reporting cycles.
