

Know your numbers. Sleep at night.

Most owners find out about a cash crisis when it's already here. MILÒN shows your business health as one score — where the problem lives, what it's costing you, and what to do next.

THE PROBLEM

- You see your accountant once a quarter. The business doesn't wait.
- Software reports the past. You need next week's cash.
- Advice arrives as a 40-page pack nobody remembers.

WHAT YOU SEE

One health score — Truth, not theater.

13-week cash forecast — See dips weeks early.

Four pillars — Profit · Cash · Assets · Financing.

Next moves — 930+ ranked fixes in plain language.

Accountant notes on the number — Same screen, both sides.

HOW IT WORKS

1

Upload financials / connect QuickBooks (or your accountant does)

2

Score in under a minute after processing

3

Open it anytime — phone-friendly, no meeting required

MILÒN doesn't replace your accountant.

It closes the gap between their numbers and your decisions — monthly, not once a year.
